

Playback Evidence from Hy DVR

To playback evidence that has been burned from a DVS Hybrid DVR please follow the simple steps below:

- Place CD/DVD into drive of a Microsoft Windows Computer
- The CD/DVD will bring up an “AutoPlay” window on screen, click on “Run DVR_Player.exe”
- This should now bring up the “DVR_Player” , click on the “Playback” button (highlighted below)

- After clicking on the “Playback” button, a new window will appear, click “Playback” again.
- When the resulting “Playback” window appears just click “OK” to begin viewing the footage

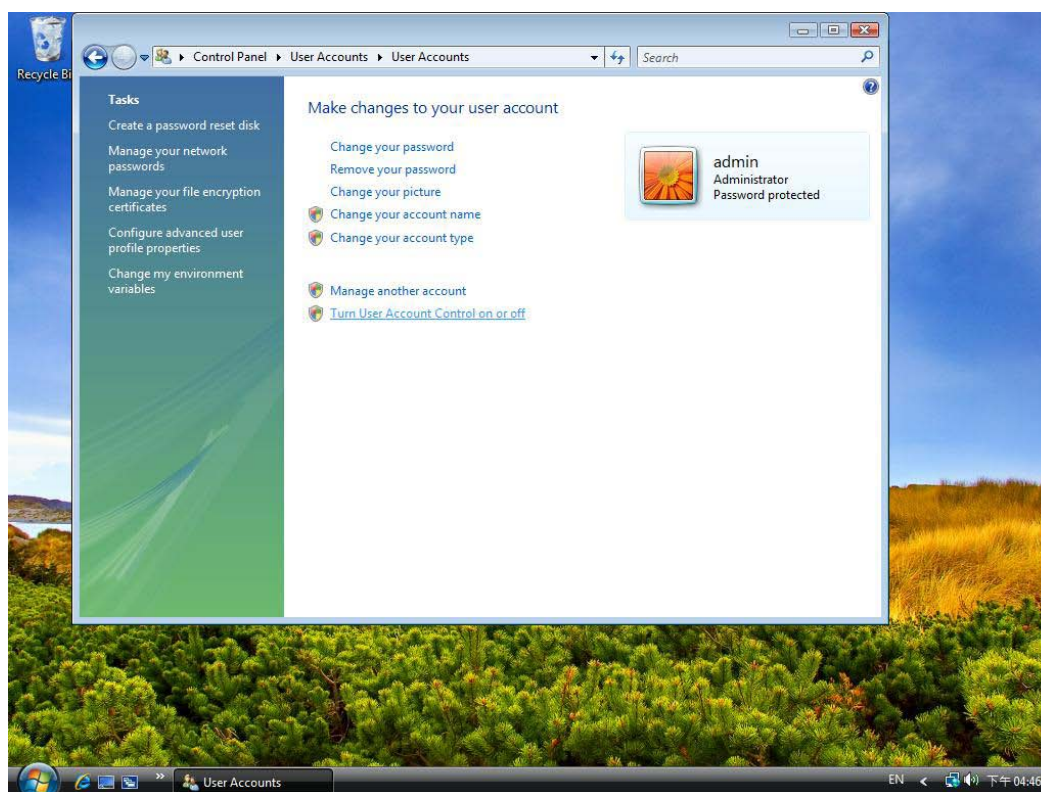

Playback Evidence from Hy DVR

If you receive the following error message, please read on for details on how to fix this:

Error

Remote200.ocx not installed or it couldn't be installed. Please check user privilege

1. Click "Start Menu", select "Control Panel" and then choose "User Accounts"
2. Under "User Account" select the last item "Turn user Account Control on or off" as indicated below

3. You should now be able to un-check box, "Use User Account Control (UAC) to help protect your computer."
4. Click OK and Restart your computer. You will now be able to run DVR Player.

Notice: This setting triggers "Windows Security Centre" warning message. You may need to gain permission from your IT administrator to complete these steps.
