

Hybrid DVR

Here you will find a quick and easy guide for the most commonly accessed functions; a full manual should be included.

Search for an Incident

- Press the Search key
- Using the arrow keys, enter your username and password
- Make a note of the "From" time in the "Search By Time" menu. This is the earliest recording that is currently stored on the recorder.
- If your incident happened earlier than the "From" time, it will not be on the recorder to view.
- Move the cursor down to the "Select" option in the "Search By Time" menu.
- Using the directional arrow keys and the "Enter" button, input the required date and time.
- Move the cursor down to "Begin Playback" and press the "Enter" button. Playback will start immediately.
- You can now use the directional arrow keys to access to 'Fast Forward' and 'Rewind' functions.
- To view the footage from one camera full-screen, press the corresponding camera number. Press the "Mode" key to return to "Split-screen" view.

Copy an Incident to Disc for Police Evidence

- Place the CD-R or DVD-R into the drive, using the eject button on the front of the drive,
- Following the above instructions, search for your incident and play it back.
- As you are viewing the footage press the copy button to mark the start of the section you would like to save.
- When you reach the end of the footage you would like to save to disc, press the copy button again. This will mark the end section.
- You will now be presented with a summary screen, please make a note of the file size. This will be presented in Megabytes (MB)
- After you press enter to confirm, the Axio-HY recorder will automatically copy the video to the CD/DVD disc drive this may take a while, depending on how much video is being saved.
- After a successful completion you will be presented with a message, it is now safe to remove your disc.
- You can now press the "Play" button to return you to the normal "Live" screen view.

Playback evidence from DVD or CD

- Once you have copied footage to a disc, you will need to insert this disc into a PC computer to play back.
- Once inserted into your PC, the disc should "AutoPlay". Select Run DVR_Player.exe to begin the Player
- Click "Play" to begin playback.

Things to look out for...

- When playing back your CD/DVD on Microsoft Windows Vista you may experience issues, this will be related to the associated User Rights on your computer. Please visit www.dvs.co.uk/support for further information.
- Compatible blank media is DVD-R, DVD+RW, CD-R & DVD+R
- If there is a USB memory stick inserted into the Axio-HY recorder as well as a blank CD/DVD, the footage will automatically go to the USB memory and not the blank CD/DVD.
