# AcuSense Technology

## ACUSENSE

A sense of safety is one of the most basic human needs, and that goes for both personal and property safety. And this is exactly why people install security systems in their homes and businesses.

Compared to conventional sensor-based alarm systems, a video-based security system that utilises cameras has several advantages: the ability to watch events in real-time over the live feed, capture critical data around those events, and provide solid and accurate evidence for law enforcement.

AcuSense technology adds a touch of intelligence to Hikvision's popular cameras and video recorders, making them perfect for an accessible and intelligent security system. Based on deep learning technology, AcuSense helps you focus on human and vehicle events in two ways: alarms will only trigger when the preset type of intrusion takes place, and video footage is sorted by target-type categories for easier searching through recorded footage. Strobe light and audio alarms serve as virtual security guards, protecting users from potential risks by warding off intruders. When emergencies occur, related videos are classified into human and vehicle categories for quick search and retrieval.

Sophisticated, highly effective, and affordable, the AcuSense solution provides SMB owners and operators with intelligent and easy-to-use protection system for their property and assets, while helping resellers build a uniquely competitive go-to-market proposition.

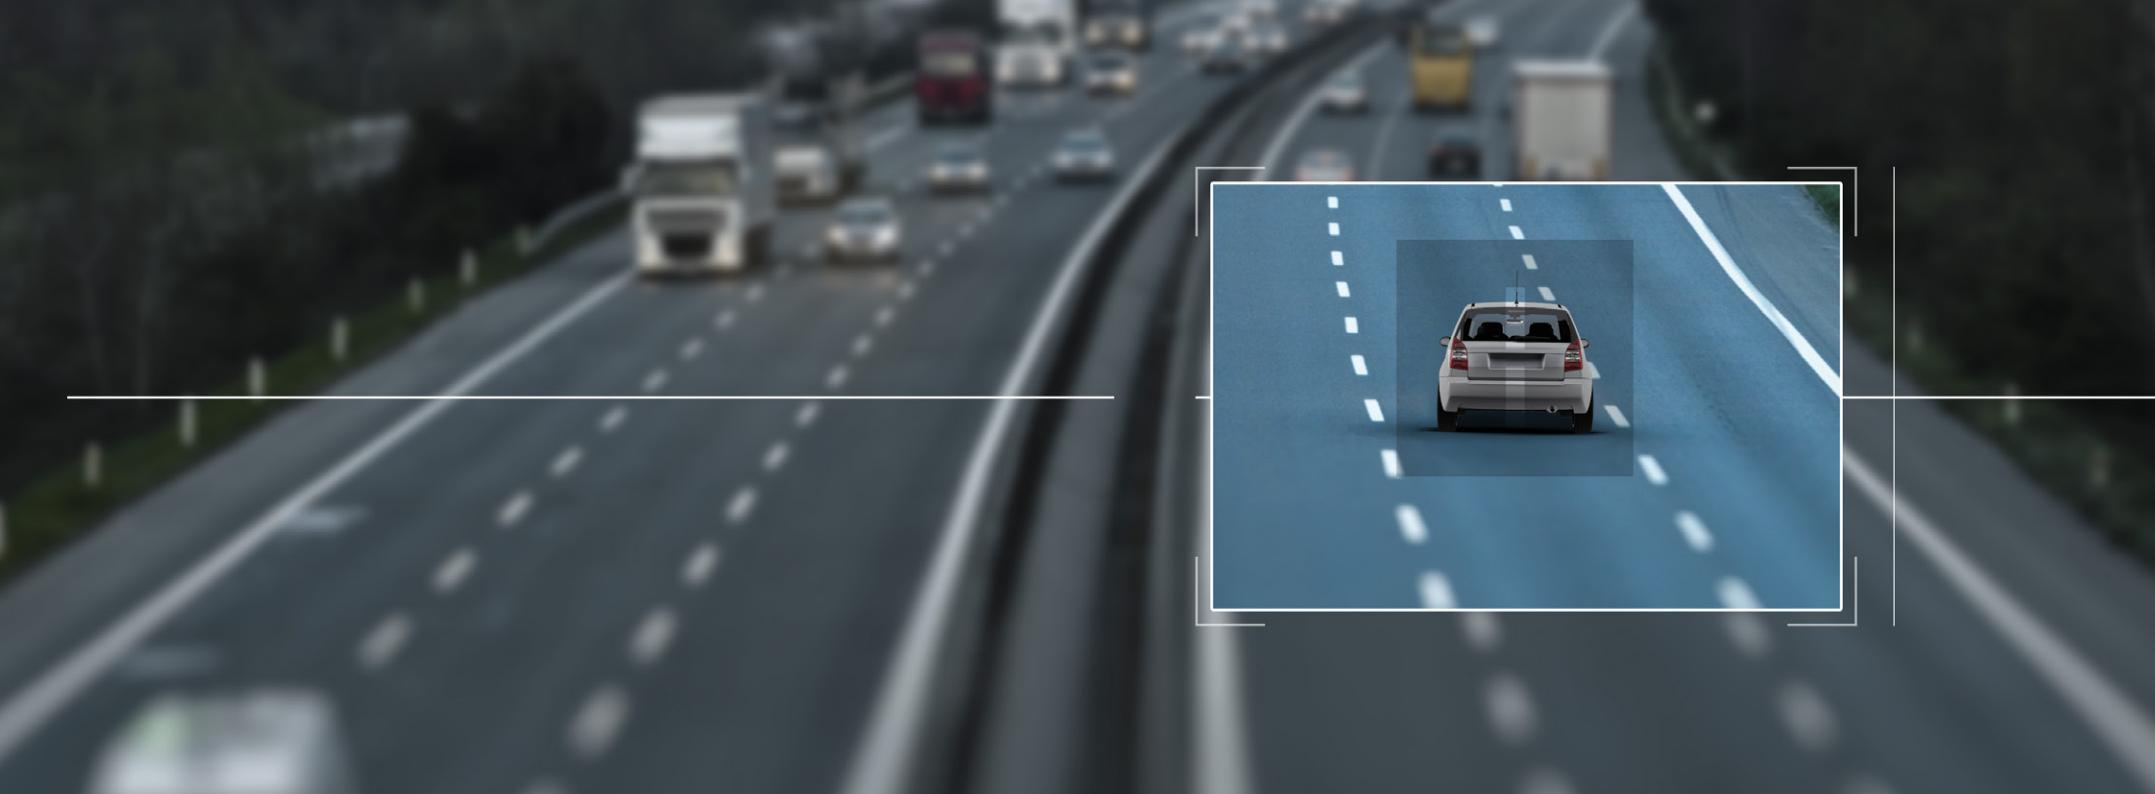

## COLORVU TECHNOLOGY

Darkness provides cover for theft, trespassing, and other crimes. When incidents occur at night, dim, low-quality images from conventional cameras miss or lose critical details. Cameras with infrared LEDs are able to provide extra light for clearer images, but in black-and-white.

But now, imagine capturing vivid, full colour details – such as the colour of people's clothing or of a car – even in total darkness. Hikvision ColorVu Technology makes this possible.

Hikvision ColorVu Technology enables front-end products to capture details in low light with three advantages: advanced hardware, superior ISP algorithm, and reliable quality control. ColorVu technology employs two specific breakthroughs in hardware technology: advanced lenses and powerful sensors. These lenses reach up to F1.0, allowing more light to enter and thereby increasing image brightness. Next, high-sensitivity sensors vastly improve the utilisation of that light. The pioneering ISP algorithm produces precise colour rendition to generate accurate full colour images. Moreover, active alignment technology guarantees the focusing performance of lenses in the mass production of ultra-high definition ColorVu products, resulting in superlative quality control.

Extreme light conditions are also taken into consideration in the design process. Some cameras are equipped with warm, natural-looking supplemental lighting. This way, when there is no light source whatsoever – even starlight or street lights – they can guarantee full colour imaging. For most scenes, the environmental light is bright enough for ColorVu cameras to render vivid colour without supplemental lighting.

# 4K

With the development of 4K technology quickly coming into focus, opportunities to use this technology in security will continue to grow. As a leading video security equipment manufacturer, Hikvision has paid close attention to the rise in high-resolution imaging, and launched a total 4K system to harness this technology in the global security industry.

Without complementary 4K components, such as monitors and DVRs / NVRs, 4K cameras cannot be used to their full potential, and therefore have little practical use in video security. By building a total system – complete with cameras, DVRs, NVRs, and more – Hikvision provides systems that are more helpful and more useful to customers. The Hikvision 4K system, which comes equipped with a variety of smart functions, satisfies the security industry's need for ultra-high resolution and smart video monitoring.

## VISUALISING YOUR CCTV NETWORK

With a Smart-Managed Switch added to the Hik-ProConnect app, you can see your complete system topology with all related devices. All devices and their network status are visible at a glance. The app will also send a notification if there is any exception, allowing you to carry out quick remote maintenance to improve work efficiency via the Hik-ProConnect app. Using the real-time port status, you can identify network risks in advance and take action, quickly locating the problematic device. You can also remotely restart a crashed device.

COLORVU TECHNOLOGY

## NETWORK CAMERAS PRO SERIES

With a perfect balance of performance and value, Hikvision Pro Series network cameras aim to provide just the right components, including artificial intelligence features that are affordable and easy to use.

- ▶ Hikvision ColorVu technology for 24/7 full colour imaging on select cameras
- ▶ Hikvision AcuSense technology: focus on human & vehicle targets based on deep learning algorithms
- ▶ H.265+ / H.265 codec
- ▶ Up to 4K Ultra-HD
- ▶ Powered by DarkFighter
- ▶ Efficient VCA functions
- ▶ Easy to install, set up, and manage

# PTZ DOME CAMERAS

15 PRO SERIES

## PTZ DOME CAMERAS PRO SERIES

Low-light monitoring is made easy with our Pro Series PTZ cameras. Most are equipped with "powered-by-DarkFighter" technology, and some even feature ColorVu technology. Add to this an abundance of options for camera sizes and amazing zoom capabilities, and you'll find that Pro Series cameras provide the ideal solution for a huge variety of use cases and scenarios.

- ▶ Multiple designs for indoor or outdoor scenarios (5-, 4-, and 3-inch)
- ▶ Almost all products support Powered by DarkFighter
- ▶ Min. illumination: Colour: 0.005 lux @ (F1.6, AGC ON)  
B/W: 0.001 lux @ (F1.6, AGC ON) IR: 0 lux
- ▶ Hikvision ColorVu technology
- ▶ H.265+ / H.265 codec
- ▶ Up to 2560×1440 (4 MP) resolution
- ▶ Auto-tracking technology (supported by specific products)
- ▶ More zoom ratio options – 25x / 15x / 4x
- ▶ Various VCA rules: face detection, intrusion detection, line crossing detection, region entrance detection, region exiting detection, object removal detection, unattended baggage detection, audio exception detection
- ▶ Supports ONVIF and CGI
- ▶ Supports Hikvision SDK and Third-Party Management Platform
- ▶ 4'', 5'' IR models (S5) support false alarm reduction and human & vehicle classification

## HEATPRO

Professional Protection Made Simple

Hikvision HeatPro Series Cameras feature deep-learning thermal video analytics for all-weather perimeter protection, object temperature measurement, and fire detection with real-time alarms. They are easy to configure, making the cameras ideal for SMB applications in residential, retail, parking, museums, data centers, and other vertical industries.

- ▶ All-weather deterrence and alerts
- ▶ Simple, three-step deployment for perimeter protection
- ▶ Thermal video analytics with deep-learning human & vehicle classification, reducing maintenance overhead
- ▶ Temperature exception alarms for fire prevention
- ▶ Visual and auditory alarms (offered by / PA models)

## ANPR SERIES

The Hikvision ANPR application captures a vehicle's number plate in real time and then compares or adds it to a pre-defined list. Once a number plate has been recognised and stored, an appropriate action is taken, such as opening a gate, adding a cost, or generating an alert. Deep Learning algorithms distinguish between small and large vehicles, with the added ability to detect the vehicle make, model and colour. The system can be programmed to search for anomalies such as cars travelling in designated bus lanes, or vehicles driving without number plates.

23 PRO SERIES

## NVR PRO SERIES

Hikvision Pro Series NVRs feature optimised H.265+ and H.264+ compression codecs, enabling highly effective bandwidth and storage management. With plug-and-play functionality, accessing IP cameras and other smart functions has never been easier. The Pro Series is the ideal solution for small- to medium-size businesses.

- ▶ 4-ch human & vehicle classification on VCA results for AcuSense NVRs
- ▶ One face recognition channel for AcuSense NVRs
- ▶ Quick target search for AcuSense NVR and I / K Series NVRs
- ▶ Up to 16-ch @ 1080p decoding for AcuSense NVRs and I-Series, 8-ch @ 1080p decoding for K-Series (except K1)
- ▶ GUI 4.0 and E-UI, intuitive and easy-to-use interface
- ▶ Supports automatic addition of inactive cameras
- ▶ Up to 300 m PoE distance for I-Series and K-Series NVRs
- ▶ ISUP protocol accessible

## TURBO HD CAMERAS WITH COLORVU TECHNOLOGY

Hikvision cameras with ColorVu Technology render full colour imaging, 24/7. These cameras can provide full colour video in ultra-low-light scenarios even without any supplemental lighting. In zero-light environments, automatic supplemental lighting from the camera itself will enhance imaging.

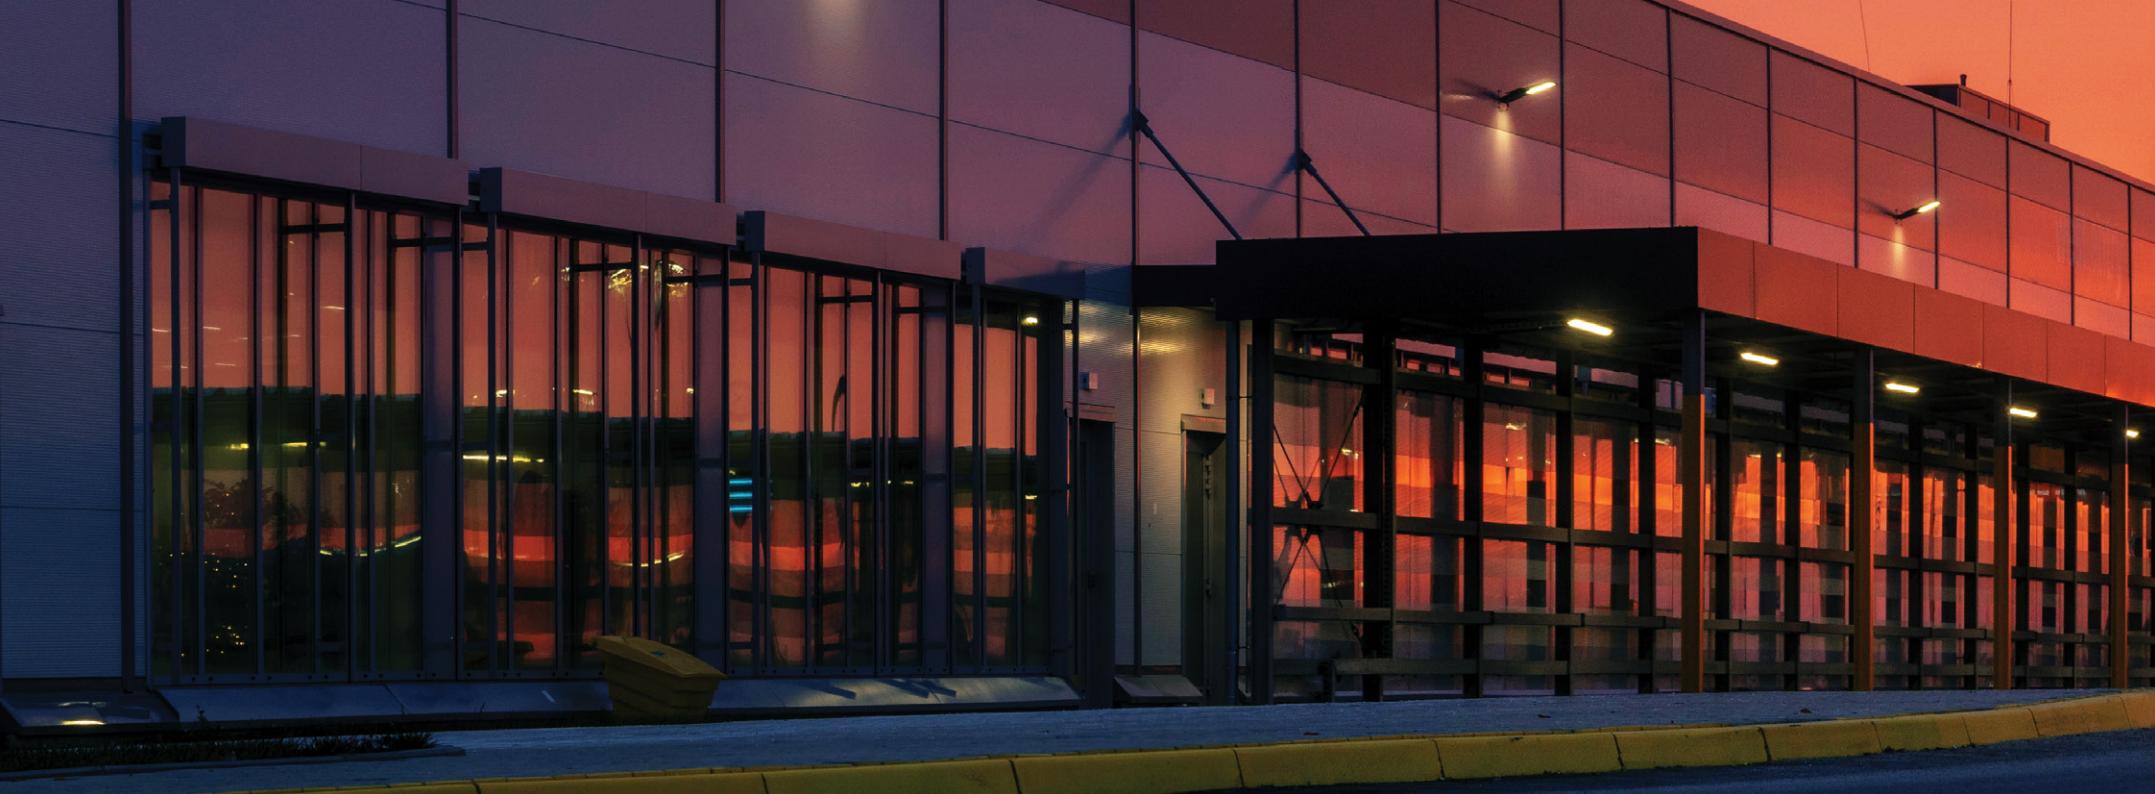

- ▶ 24/7 full colour imaging
- ▶ Ultra-low-light night vision
- ▶ 130 dB True WDR
- ▶ 4-in-1 video output
- ▶ Audio over coaxial
- ▶ PoC for easy installation

## TURBO HD CAMERAS WITH LIVE GUARD TECHNOLOGY

Select Hikvision Turbo cameras come equipped with both Live Guard and ColorVu Technology. These cameras proactively deter intruders with white light and audio warnings, and provide 24/7 full colour imaging.

- ▶ 24/7 full colour imaging
- ▶ 130 dB True WDR
- ▶ Strobe alarm and audio warning alarm
- ▶ Line out port

## TURBO HD PTZ CAMERAS

Turbo HD PTZ cameras capture high quality images even in poorly lit environments. With the embedded CMOS chip, WDR and real-time 1920 x 1080 resolution becomes possible. The speed domes feature wide compatibility thanks to their 4-in-1 video output.

- ▶ Up to 1920 x 1080 resolution
- ▶ 4-in-1 video output: 1 BNC, 4 switchable video outputs for TVI / AHD / CVI / CVBS
- ▶ More options for zoom ratio – 25x / 15x
- ▶ 120 dB WDR
- ▶ Minimum illumination

## DVR TURBO DVRs WITH ACUSENSE TECHNOLOGY

Based on deep learning technology, Hikvision's Turbo DVRs with AcuSense Technology have the ability to recognise and extract human body and vehicle targets. This allows Turbo DVRs with AcuSense Technology to achieve high-accuracy alarm functionality as well as rapid retrieval of past video clips based on human or vehicle classifications. These intelligent features liberate users from time-consuming browsing and searching.

- ▶ AcuSense Technology powered by deep-learning algorithm
- ▶ Motion Detection 2.0 with human & vehicle classification for all analogue channels
- ▶ Facial comparison
- ▶ Search human and vehicle targets quickly
- ▶ Ultra HD, compatible with cameras of up to 4K resolution
- ▶ H.265 Pro+ / H.265 Pro / H.265
- ▶ Audio over coaxial
- ▶ Adaptive signal input (five types: HDTVI / AHD / CVI / CVBS / IP)
- ▶ Enhanced network camera access capability

# MONITORS VALUE SERIES

Value Series monitors deliver 24/7 operation at an affordable price.

- ▶ Wide viewing angle
- ▶ Multiple inputs: HDMI / VGA
- ▶ 3D comb filter, 3D De-interlace, 3D noise reduction
- ▶ Longer life span for critical performance and minimum TCO
- ▶ Perfect integration and compatibility with DVRs and NVRs
- ▶ Standard VESA bracket
- ▶ On duty 24/7 for mission critical applications

54 SMART MANAGED SERIES

## SWITCHES PRO SERIES

Aggregate access switches and provide powerful management functions.

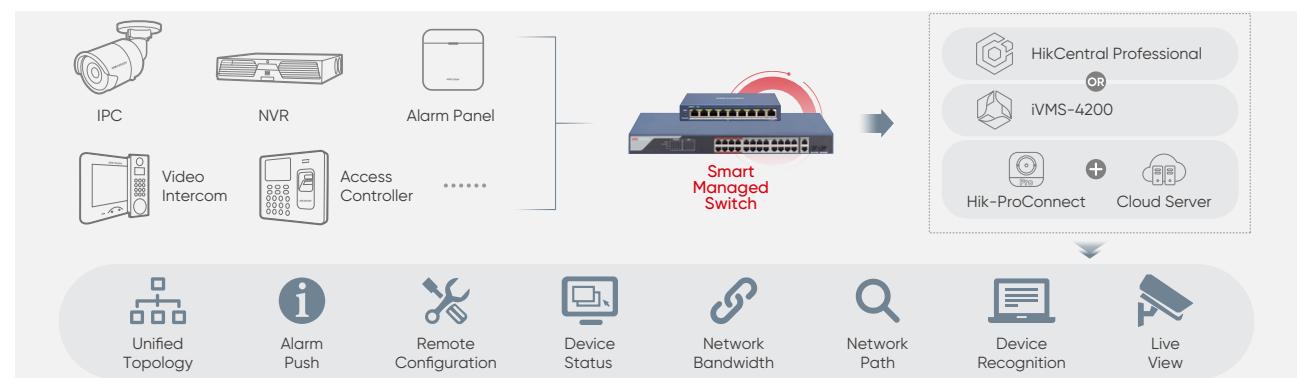

- ▶ Layer 2, 100 M / 1,000 M network switch
- ▶ Unmanaged or managed functions
- ▶ 802.3af / at / bt PoE standard (on select models) and high PoE power budget
- ▶ 8/4-core adaptable power supply to drastically reduce power loss (on select models)
- ▶ Data from key cameras will be transmitted with priority to VIP ports (on select models)
- ▶ EXTEND mode increases transmission distances to 300 m (on select models)
- ▶ 6 KV surge protection ensures normal and reliable operation even in harsh conditions (on select models)
- ▶ "Watchdog" function enables automatic camera detection, reducing the need for manual inspections and restarts and contributing to a self-healing network (on select models)

# SWITCHES SMART MANAGED SERIES

Hikvision Smart Managed Switches provide centralised and visualised management of all Hikvision IP devices with perfect integration with Hikvision software. This allows for comprehensive operation and maintenance capabilities based on a unified topology. As well as system topology, the network condition, device health status and alarm notification can also be displayed and managed in a visualised way. The result? Better intelligent management and enhanced operational efficiency.
